01

Cloud Solutions & Services

Our Expertise

Cloud Assessment

Our cloud assessment provides a comprehensive analysis of your current infrastructure & offers a roadmap for potential solution.

Cloud Migration

Protect your business from potential data breaches & loss with our reliable & secure cloud backup & security services.

Cloud Backup & Security

Our expert team will assess, plan & execute a seamless migration strategy tailored to your specific needs, minimizing downtime & ensuring data security.

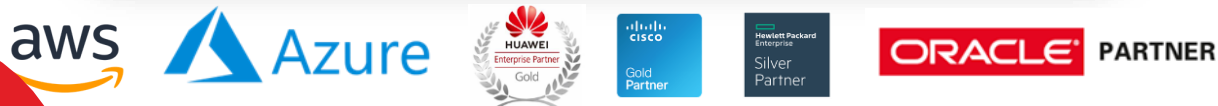

Cloud Operations & Management

Our experts analyze your current cloud environment, identify areas of inefficiency, & implement optimizations to improve performance, reduce costs, & ensure scalability.

Cloud Optimization

We focus on proactive monitoring & management of your cloud infrastructure to ensure optimal performance.

Our Expertise

01

Cloud Solutions & Services - AWS

Our Expertise

AWS Cloud Managed Services

- Discovery & Planning Assessment
- Cloud Migration
- Cloud Landing Zones
- Disaster Recovery Planning
- DevOps & Automation
- AWS Well-Architected Review
- Monitoring & Governance
- Security & Performance Management
- TCO Analysis – Cost Optimization & Budget planning
- Backup & Recovery

01

Cloud Solutions & Services - Azure by Microsoft

Our Expertise

Migration

- On-Prem to Azure Cloud
- On-premise Exchange to Office 365 (or Hybrid Setup)
- Google Workspace to Office 365

Microsoft 365 Security Landscape

Defender, Azure Information Protection, Input, Windows Virtual Desktop, Conditional Access, & more.

Enterprise Mobility + Security covers:

Context-aware security, Supporting a wider range of devices including Bring Your Own Device (BYOD) all from one console. With more apps & platforms to support than ever, provide unified access all with a single username & password using single-sign-on Protect documents wherever they end up (copied, forwarded, uploaded) while retaining control with options to revoke & track.

Azure Backup & Recovery

Azure Disaster Recovery for Enterprise data security

Azure Functions & Webapps

Azure Database as a Service

02

Cyber Security Solutions

Our Expertise

Proactive Threat Analytics

Information that includes situational context of the incipient stages of an attack campaign, thereby giving analysts time to prioritize alerts & act quickly.

- Cyber Threat Intelligence
- Brand Threat Monitoring
- Attack Surface Monitoring
- Dark & Deep Web Monitoring
- Data Leaks Monitoring
- Infrastructure Monitoring

Managed Detection & Response

MDR is a fully managed 24/7 service delivered by experts who detect & respond to cyberattacks targeting your computers, servers, networks, cloud workloads, email accounts, & more.

- Instant Security Operations Center (SOC)
- 24/7 Threat Detection & Response
- Expert-led Threat Hunting
- Full-Scale Incident Response Capabilities
- Security Incident & Event Management

Our Expertise

Cybersecurity Tools

Next Generation Firewall (NGFW)
Endpoint Detection & Response (EDR)
Data Leak Prevention (DLP)

- Stop Unknown Threats
- Block Ransomware
- Prevent Exploits
- Reduces the Attack Surface
- Zero-Day Threat Protection
- Data Loss Prevention

Privilege Access Management

A Set of Technologies that allow organizations to identify, secure & monitor accounts that have elevated privileges in order to minimize risks & ensure compliance.

- Secure Remote Access
- Multi-Factor Authentication
- Session Recording & Threat Analytics
- Continuous Discovery
- Password Management
- Just-In Time Access

02

Cyber Security Solutions

Our Expertise

Vulnerability Assessment

A vulnerability assessment is a systematic review of security weaknesses in an information system

- Discovery
- Analysis
- Validation
- Exploitation
- Reporting

Penetration Testing

Penetration testing is an ethical hacking technique used for detecting security vulnerabilities existing in your enterprise IT environments, adjoining quick mitigation strategies.

- Network Infrastructure Testing
- Web Application Testing
- Cloud Penetration Testing
- Wireless Testing
- Social Engineering
- Mobile Security

02

Cyber Security Solutions

Our Expertise

Cybersecurity Auditing & Compliance

A cybersecurity audit guarantees a thorough, 360-degree examination of the security postures within your company. It recognizes organizational weaknesses, hazards, & threats as well as the effects these risks have on various aspects. Like ISO 27001, NESA, ADHICS, GDPR, HIPAA etc.

- Security Gap Assessment
- Cyber Risk Assessment
- Risk Treatment Plan
- Technology Implementations
- Policies & Procedures
- Implementation Reviews
- Security Testing
- Security Awareness
- Internal Audits

Infrastructure Control Assessment

The controls assessment delivers an in-depth, independent review of your company's ability to protect information assets against cyber threats.

- Perimeter & Content Security
- Firewall & UTM
- Endpoint Security
- Business Intelligence Analytics
- Ransomware Susceptibility Checks

03

Enterprise Data Management

Our Expertise

Server & Storage Solution

We offers a comprehensive range of storage types, including DAS, NAS, SAN, & cloud storage.

Virtualization

GBS delivers a software-based virtual versions of your computing, storage, networking, & more.

Backup Services

Your data will be securely backed up & easily recoverable, giving you peace of mind & ensuring business continuity.

Disaster Recovery Solution

We value diversity & respect the cultures & opinions of our employees & clients.

Identity Access Management

We offer comprehensive management of identities, access control, & authentication across people, software, & hardware.

Microsoft Solutions

We offer a range of solutions based on Microsoft applications.

Remote Infrastructure Management

Our RIM solutions enables monitoring & management of IT infrastructure

04

Enterprise Networking Management

Our Expertise

Enterprise Mobility

Our enterprise mobility solutions can manage operations for mobile devices, applications, content, & data while ensuring security & compliance.

Switching & Routing

Get centralized visibility & control of wired, wireless, VPN, & WAN networks.

Collaboration

Exchange, Teams, One Drive, Share-point, Outlook, Cisco Webex, Zoom, & more.

IP Telephony Services

We offer IP telephony services, which allow for telephony via the internet instead of the traditional PSTN.

WAF & Managed Firewall

Our Managed Firewall & WAF services provide clear & well-maintained firewall policy rules & security event management to protect web applications from attacks, with 24x7 monitoring.

Network Monitoring Solutions

Analyze network data to provide network administrators with information on the status of network appliances, link saturation, active devices, & sources of network problems & anomalies.

Our Expertise

05

IT Managed Services

Our Expertise

-  **Managed Operation as a Service (NOC & SOC) 24/7 services**
-  **Managed Firewall**
-  **Managed Cloud Security**
-  **Managed EDR & NDR**
-  **Managed Backup & Disaster Recovery**
-  **Managed 24/7 IT Helpdesk Services**
-  **Managed SIEM**
-  **Managed NAC**
-  **Managed PAM**
-  **Managed DLP**
-  **Managed Email Security**

Our Approach

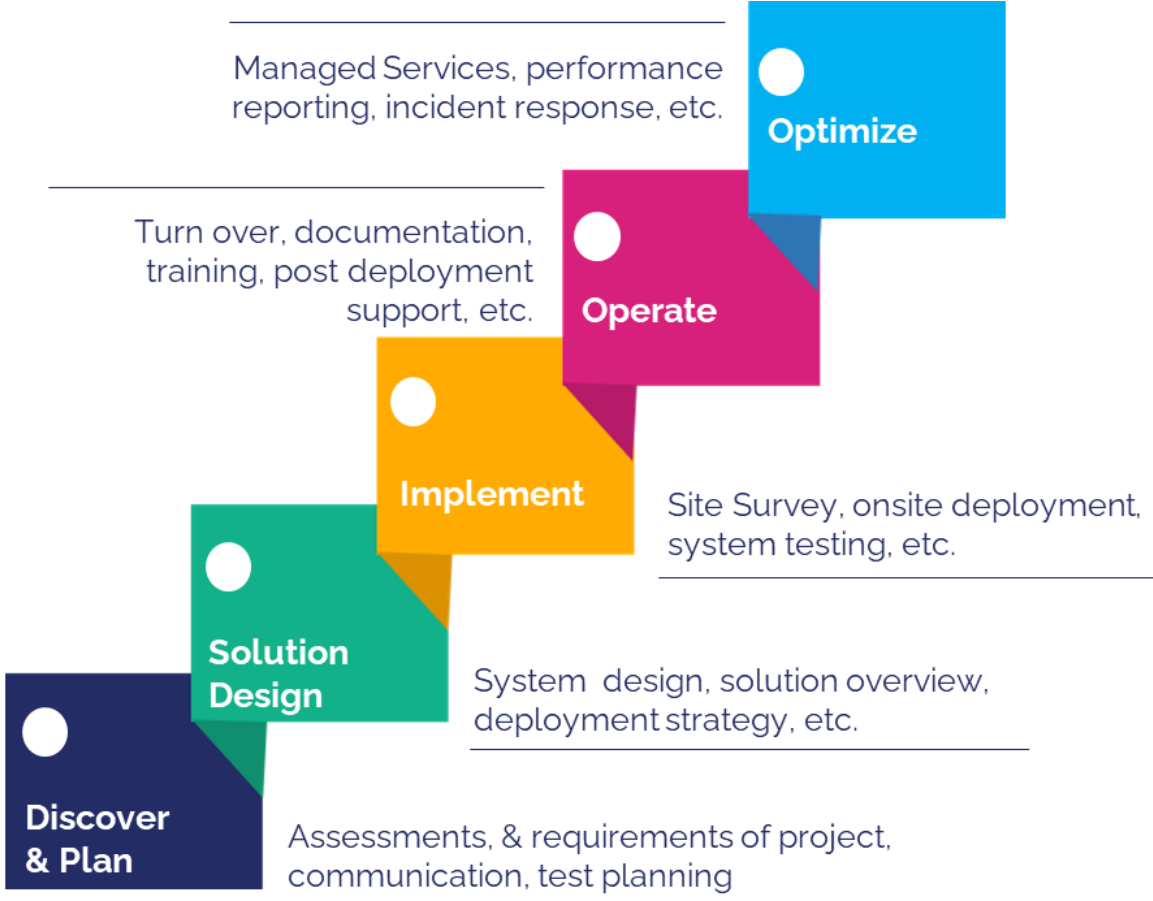

Discover & Plan: A thorough evaluation of your issue to determine needs & identify areas for improvement.

Solution Design: Creation of fitting strategy to meet your unique needs.

Implementation: Deployment of technology solutions & managed services to resolve & improve.

Operate: Provide support with regular reporting & analytics of your IT infrastructure & performance.

Optimize: Scalable solutions & flexible service delivery options to adapt to changing business needs.
